

Sustainable Environmental Policy

At Avani Ibn Battuta Dubai, we are committed to responsible environmental management across our operations. As part of Minor International, we support the Group's commitment to becoming a Net Zero Carbon organization by 2050 through reviewing our carbon inventory and applying the 4R approach: **Reduce, Reuse, Recycle and Replace**, while managing residual carbon emissions.

Our Environmental Policy focuses on measuring, managing and mitigating environmental and climate-related risks, establishing environmental goals, engaging our guests, business partners and colleagues, complying with applicable environmental laws and regulations, and continuously improving our environmental performance in line with the Green Growth 2050 Global Standard, under which Avani Ibn Battuta Dubai is Platinum Certified.

Our Approach

Responsible Sourcing

We review and replace existing raw materials and products, where applicable, with options that have a lower environmental impact.

Resource Efficiency

We work to optimise the consumption of natural resources, including raw materials, water and energy, while identifying opportunities to improve efficiency.

Environmental Initiatives

We support relevant environmental initiatives, including renewable energy opportunities where applicable across our value chain.

Monitoring & Improvement

We establish and implement action plans and monitor our environmental impacts against Green Growth 2050 verified targets, supporting continuous improvement across our operations.

Training & Awareness

We provide training on environmental conservation and responsible practices to relevant colleagues and stakeholders across our value chain, supporting awareness and our environmental goals.

Compliance

We comply with relevant environmental laws, regulations and other applicable requirements.

Green Growth 2050 Certification

Avani Ibn Battuta Dubai is **Certified Platinum to the Green Growth 2050 Global Standard 2025**, with certification valid until **5 November 2027**.

Our certification reflects our ongoing efforts to measure and manage environmental performance across our operations in line with the Green Growth 2050 Global Standard.
